

HIGH FREQUENCY CRYOGENIC ATTENUATORS AND TERMINATIONS

SERVING THE CRYOGENIC MARKET, ONE CONNECTION AT A TIME

QUICK FACTS

- 1.85 mm connectors servicing up to 65GHz
- Successful down to 20mK
- 0.5-2 Watts power handling
- Industry leading VSWR values
- All standard dB values available

ABOUT THIS PRODUCT

Looking to take your high frequency lines to mK temperatures? We've got you covered. Our new line of 65GHz attenuators and terminations are ready for application in your test set-ups, cryostats, and more. Our new product lines have improved internal geometries to deliver supreme thermal grounding. Handling up to 2W of average power and operating with industry leading VSWR values, the products are the perfect solution for your high frequency, low temperature needs.
