ABOUT THIS PRODUCT

Heading into space? Our 4-way space qualified power dividers are the perfect solution. Fully TVAC compliant with industry leading VSWR, our 4-way space qual power dividers are excellent performers. They are currently servicing a telecom satellite, allowing thousands of people previously unable to access the internet to have a fast, wireless connection. These power dividers have an average input power of 2 Watts and service an input frequency range of 12.5-15 GHz. Inquire today to hear more about our space qualified power dividers!
