

WATT'S HAPPENING

High Power Products

Serving the Test and Mil/ Aero Markets

- SMA, Type N, and TNC Connectors
- From 5-250 Watts
- Convection Cooled
- Industry Leading VSWR
- DC-18GHz

Serving 0.5-250 Watts, XMA has devices ready for your high powered RF systems. XMA's high powered terminations and attenuators come in a variety of connector types and are convection cooled. These RF components have industry leading VSWR and are commonly used in test systems and in the Mil/Aero market. XMA designs and manufactures the resistive chips in-house, and is happy to customize high power orders to meet your needs.
