

# HIGH FREQUENCY PRODUCT FAMILY

SERVING THE 5G AND TELECOMMUNICATION MARKET, ONE CONNECTION AT A TIME

## QUICK FACTS

- DC-110 GHz
- Includes attenuators, power dividers, couplers, DC blocks, and terminations
- Offers 2.92, 2.4, 1.85, and 1.0mm connectors
- Industry leading VSWR
- Driven by in-house designed and fabricated resistive chips

## ABOUT THIS PRODUCT

XMA's high frequency products are the ideal solution for your Ka, Q, U, V, and W band systems. Including attenuators, power dividers, directional couplers, DC blocks, terminations, and select adapters, this line of passives is reliable and flexible. Each product has a 50 ohm impedance, and is otherwise customizable. Our COTS attenuators come in standard values of 0, 3, 6, 10, 20, and 30dB, and our dividers come in standard ways of 2, 3, 4, 6, and 8. This product line is made possible by our in-house thin film chip fabrication lab, based in Manchester, NH. We look forward to furthering your next high frequency projects.
